

ORDER FORM

Our reference: E61-APOPO-2026-001
Date: 02/10/2026
Validity: Valid for 30 days

From: **element61 N.V.**
Address: Buro & Design Center - Esplanade 1, bus 96 - 1020 Brussels
VAT Number: BE 0888 581 168
Your Contact: Parc - Project Manager, element61

Customer and billing information

Customer Name: APOPO
Customer VAT Number: To be confirmed by APOPO
Address: Attn. Pieter, Head of Training & Research
Postal Code: To be confirmed by APOPO
City: Morogoro
Country: Tanzania
Invoicing email address: To be confirmed by APOPO

Services Details

Description of services

Context

APOPO is a non-profit organisation that develops and deploys scent-detection technology to address urgent global health and humanitarian challenges. One of its most impactful programmes uses African giant pouched rats – HeroRATs – to screen human sputum samples for tuberculosis (TB). Working as second-line screening alongside partner clinics, the rats help identify TB-positive cases that might otherwise be missed, especially in low-resource settings.

Each rat has an individual indication threshold: when it sniffs a sample for longer than this threshold, the sample is flagged as suspect and sent to APOPO's lab for confirmation. APOPO reports that its rats reach 95% accuracy today; FDA approval requires 98%. APOPO holds a considerable amount of historical data that has not yet been used to close this gap.

In parallel, APOPO's board wants to know where the organisation stands on data, reporting and AI, and what it would cost to get there. The Head of Training & Research presents to the board in about three weeks. APOPO has therefore asked element61 to run a proof of concept (PoC) of two days on its TB detection data that delivers:

- evidence from APOPO's data, not opinions;
- a clear storyline the Head of Training & Research can present to the board himself;
- a realistic path forward, with a price tag.

Objectives

The PoC combines one primary objective, chosen from Goal 1 or Goal 2, with two secondary objectives that are always part of the scope.

Primary objective – Goal 1 or Goal 2 (one topic)

- **Goal 1 – Improve the service:** help APOPO detect and reach more TB-positive patients through data-driven improvements to screening, quality control and follow-up.
- **Goal 2 – Strengthen the data backbone:** give APOPO trusted, audit-proof data and fast, trustworthy answers for researchers, auditors, donors and the board.

One topic within Goal 1 or Goal 2 is selected after the stakeholder interviews and confirmed with the element61 project manager by Tuesday 13:00.

Secondary objectives – Goals 3 and 4 (always in scope)

- **Goal 3 – A board-ready pitch:** a storyline and one explicit decision for the board, built so that the Head of Training & Research can present it himself.
- **Goal 4 – APOPO × element61 roadmap:** a maturity snapshot and a phased, costed roadmap, so APOPO can decide on a concrete next step.

The primary objective provides the evidence; the secondary objectives turn that evidence into a decision and a path forward.

Scope of work

Duration: 2 days (proof of concept), Tuesday 6 and Wednesday 7 October 2026.

Primary objective – topics to choose from

Goal 1 – Improve the service:

- **Rejection threshold** – Can a rat-specific rejection threshold catch missed TB+ samples without making follow-up testing unaffordable?
 - o KPI: Sensitivity and accuracy up, with extra confirmation tests within the lab budget.
- **Committee of rats** – Which combination of rats and which voting rule maximise accuracy while keeping throughput feasible?
 - o KPI: Accuracy up at a feasible number of samples screened per day.
- **Live session quality control** – How can APOPO detect an unreliable screening session in time to rescreen the samples?
 - o KPI: Share of unreliable sessions caught in time; TB+ samples rescued by rescreening.

Goal 2 – Strengthen the data backbone:

- **Data foundation & LIMS migration** – How does APOPO migrate to the new LIMS while keeping one trusted, audit-proof version of its study data?
 - o KPI: 100% of records reconciled, identical KPIs before and after, zero study downtime.
- **Self-service data & audit copilot** – How can researchers and auditors query APOPO's data themselves and get answers they can trust?
 - o KPI: Time-to-answer from days to minutes, % correct answers on an agreed question set, analyst hours freed.
- **Automated impact & audit reporting** – How can APOPO produce consistent, audience-specific reports in hours instead of days?
 - o KPI: Report cycle from days to hours, one number per KPI across audiences, cost per case available.

For the selected topic, the PoC works towards three levels of ambition. Level 1 is the committed minimum; Levels 2 and 3 are delivered on a best-effort basis within the two days.

- **Level 1 – Diagnose:** one clear message with a number on the KPI, backed by evidence.

- **Level 2 – Design:** options compared, a trade-off made explicit, a recommendation and next steps.
- **Level 3 – Demonstrate:** a convincing demonstration of how the proposed solution would work in practice, and a phased roadmap.

Secondary objective – Goal 3: a board-ready pitch

- A storyline of 5–7 core slides: Situation → Complication → Resolution → Ask, one message per slide, every claim backed by evidence from the primary objective.
- Built to be presented without element61 in the room: executive summary first, an explicit decision asked of the board, anticipated objections with backup slides, and speaker notes.
- Where time allows: stress-tested with APOPO, including a one-slide / one-minute version.

Secondary objective – Goal 4: APOPO × element61 roadmap

- A maturity snapshot of where APOPO stands today on data and data quality, performance management and AI.
- A three-horizon roadmap – Foundation, Insight, Intelligence – with one-off (CAPEX) and yearly running (OPEX) costs per horizon, as ranges with visible assumptions.
- Where time allows: a first engagement proposal APOPO can fund, with scope, team, timeline, success KPI and 3-year total cost of ownership.

Approach and planning

Day 1 – Tuesday 6 October 2026

- 09:00 – 10:00 Kick-off and briefing (element61)
- 10:00 – 12:00 Stakeholder interviews with APOPO's Head of Training & Research and Senior Data Analyst
- 13:00 Primary objective (Goal 1 or Goal 2 topic) confirmed with the element61 project manager
- End of day Status update to APOPO

Day 2 – Wednesday 7 October 2026

- 09:00 Stand-up
- 12:00 – 14:00 Storyline review (slide titles)
- 15:00 – 17:00 Final presentation to APOPO

element61 delivers the PoC with a multi-disciplinary team of three consultants, under the supervision of an element61 project manager (Parci), who is the single point of contact for planning, priorities and escalations. On APOPO's side, the Head of Training & Research (Pieter) is the sponsor and presents to the board; the Senior Data Analyst (Julie) knows the data and the tools.

Deliverables

- A status update by e-mail to APOPO at the end of day 1.
- Primary objective: the analysis for the selected Goal 1 or Goal 2 topic, with the supporting material handed over to APOPO.
- Secondary objective, Goal 3: a board-ready presentation, including appendix and speaker notes, presented on day 2.
- Secondary objective, Goal 4: a maturity snapshot and costed roadmap.

Prerequisites

Before and during the PoC, APOPO will:

- share its data pack as received: the data catalogue (variable key), the rat session data, one single session in presentation order and the topic-specific files;
- make the Head of Training & Research and the Senior Data Analyst available for the interviews on day 1, for follow-up questions by e-mail, and for the final presentation on day 2;
- confirm in which tools and (AI) workspaces APOPO data may be processed.

Out of scope

- Goal 1 and Goal 2 topics other than the one selected as primary objective.
- Building production data pipelines or infrastructure, or deploying models or AI assistants into production.
- Cleaning or correcting data in APOPO's source systems; data is used as received.
- Integration with APOPO's or third-party systems (e.g. the new LIMS or a national TB register).
- Changes to APOPO's operational procedures, rat training or lab processes: the PoC delivers recommendations only.
- Regulatory submissions (FDA) or clinical validation of the results.
- Execution of the roadmap or engagement proposal produced under Goal 4; this would be covered by a separate order form.

Assumptions and limitations

- The PoC is limited to 2 days, within normal working hours.
- The data is shared as received from APOPO and has not been cleaned. Findings are indicative and depend on data quality and on the definitions used; definitions and assumptions are stated explicitly.
- Cost estimates under Goal 4 are expressed as effort in man-days and yearly running costs, as ranges with visible assumptions.
- Requests outside this scope during the PoC are discussed with the element61 project manager and handled as a change in scope or as a next step in the roadmap.
- All APOPO data is handled confidentially, used only for this PoC and not shared outside the engagement. Only element61 approved tools are allowed for data handling: copilot via element61 license, Ralph or a custom-hosted model in MPN-subscription AI Foundry will be allowed to handle the data or requests which may originate or are linked to the organization APOPO. Additional tools may be used upon request to and approval from both APOPO & element61 end.

The effort for this proof of concept is estimated as follows:

Description of services	Quantity	Pricing	Total
Discovery: kick-off and stakeholder interviews	1,5 MD	Fixed price	Included
Primary objective – Goal 1 or 2 topic: analysis and design	2 MD	Fixed price	Included
Secondary objective – Goal 3: board-ready pitch and final presentation	1,5 MD	Fixed price	Included
Secondary objective – Goal 4: maturity snapshot and costed roadmap	1 MD	Fixed price	Included
Project management and quality assurance	0,5 MD	Fixed price	Included
Total Services (excl. VAT)			€ 5.000

This proof of concept is delivered at a **fixed price**. The man-days above indicate the effort and are not invoiced separately.

Project Budget

In summary the following budget is required for this statement of work:

Project Items	One-time license	Man-Days	Services	Total
Implementation Services – Proof of concept (2 days): primary objective (Goal 1 or 2) and secondary objectives (Goals 3–4)	–	6	Included	Included
Project Management and Quality Assurance	–	0,5	Included	Included
Total	–	6,5	€ 5.000	€ 5.000
Project Total (excl. VAT)				€ 5.000

The Customer acknowledges to have taken notice of the general conditions attached to this order form and to accept them. In case element61 starts with the services described in this order form prior to – and in mutual agreement with the Customer – the signing of this order form, the commencement of these services will count as a Customer acceptance of the general and specific conditions described in this form and the terms & conditions. By signing this form the Customer declares that the person signing is authorized to represent the client for the services and amounts as proposed in this order form.

Thank you for confirming this order by returning a signed copy to your element61 contact or sign via DocuSign.

Order form - Terms and Conditions

1. Definition of terminology

- Agreement: the general terms and conditions and the specific terms and conditions mentioned in this order form.
- element61: element61 NV/SA with registered office at Buro & Design Center - Esplanade 1, bus 96 - 1020 Brussels registered under registration number BE 0888.581.168.
- Customer: the Customer mentioned in this order form.
- Services: the consultancy or education services as specified in this order form.
- Solution(s): pre-packaged sets of best practices, code, scripts and/or automations referred to as - among other - Out-of-the-Box Solutions or Acceleration Kits, designed to jumpstart the deployment of Analytics, Performance Management and AI platforms across various business domains.
- Validity: validity specifies the final date of the validity of the services proposed in this order form. Once the validity date has expired, the offering in this form, including the specific terms and conditions, are not applicable anymore.
- Party/Parties: all representatives from the Customer or element61.
- Overtime: Overtime delivered services are all services delivered on Saturdays, Sundays, public holidays or outside the regular working schedule of 39 hours per week between 22:00 and 07:00.

2. Obligations for element61

element61 undertakes the utmost to provide the Services and Solutions mentioned in this order form to the benefit of the Customer and respecting the terms and conditions mentioned.

3. Intellectual property of Services provided

Unless specifically stated otherwise element61 grants the Customer a non-exclusive and non-transferrable right to use the results of, as well as any Intellectual Property created with, the Services provided. This right is limited to the specific developments that have been performed at the request of the Customer.

4. Intellectual Property of Solutions purchased

In the case Customer purchases Solutions, the software-code is protected by copyright law and international treaties. Unauthorized reproduction or distribution of these Solutions, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.

Permission is granted, to any Customer purchasing and licensing a copy of these Solutions, to deal in the Solution without restriction, including - without limitation - the rights to use, copy, modify, merge and publish the Solution. The Customer purchasing and licensing a copy of this Solution will however not copy and use the Solution for any other purposes than the internal use in the context of the Out-of-the-Box Solutions and Acceleration Kits, unless agreed otherwise with element61.

The Customer will - in particular - make sure that the Solution is not accessed and copied by third-party consulting or software companies and their personnel, nor any subcontractors and/or freelancers employed directly by the Customer. Failure to do so will be considered a grave error. Third-party suppliers are permitted to use the Solution's components solely within the context of the Customer's specific project. It is expressly prohibited for all above third parties to copy, distribute, or utilize these components for any other Customers or projects. Customer will make those third parties sign the necessary legal terms to guarantee the correct use of the Intellectual Property according to this clause. Any unauthorized use will be considered a breach of Intellectual Property Rights held by element61.

5. Confidentiality

Parties must keep confidential all information mutually exchanged in context of this Agreement. In addition, information exchanged between parties, may only be used in context of this Agreement. Parties may not disclose confidential information to third parties, unless written approval by the other Party. The obligations towards confidentiality remain until 1 year after the end of the last Services or Solution updates provided, regardless of the reason for the termination of this Agreement.

Excluded from this confidentiality obligation is all information that:

- Is legally obtained from a third party and not subject to any confidentiality obligation
- Information already known by any Party before it was passed on to it in context of this Agreement
- Information which a Party has developed itself without breaching this Agreement
- Information that has become public without the intervention or fault of the Party which has received it
- Information which needs to be made public as a result of the decision of a court.

6. Anti-Corruption

Parties commit to complying with all relevant laws and regulations that prohibit, prevent, and criminalize acts of corruption and related criminal or unlawful acts. Parties shall comply with these laws and regulations in all their operations and relationships, whether or not they are related to this Agreement and the Services or Solutions provided under this Agreement, regardless of the form in which the acts occur and to whatever extent.

Parties shall pass on these obligations to their employees and directors, and shall ensure that third parties involved in the execution of this Agreement are also contractually bound by these obligations.

7. Limitation of Liability for natural persons associated with element61

The Customer acknowledges and agrees that natural persons associated with element61 bear no liability whatsoever in connection with assignments provided to element61. As such, the Customer is obliged to ensure that no claim or demand of any kind is submitted or enforced against anyone other than the legal entity element61 NV/SA itself. This limitation of liability does not affect the potential liability of element61 as a legal entity, as determined under this Agreement or applicable law.

8. Location of Services specified

All Services specified will be performed remotely or at the Customer's site. Where a particular location is necessary for the satisfactory performance of (part of) the Services, both parties will agree as-such upfront. In the event (part of) the Services are to be delivered at Customer's site, the Customer will provide a desk and parking facilities to the consultant, free of charge.

In case of work abroad, element61 will charge the following additional costs:

- Travel time beyond the Belgian border will be charged at 50% of the hourly rate
- Travel costs (hotels, taxi, car rental, train & airline tickets, ...) will be billed at cost or booked directly by the Customer. Alternatively, an extra amount per onsite consulting day will be agreed covering all travel and expenses and will be added to the daily rate.
- An additional Daily Allowance - as defined by Belgian Law – will be paid out by element61 to the consultant(s) providing the Services. Amounts are defined by the latest 'flat-rate allowances for foreign missions for civil servants' as published by the Official Belgian Journal.

9. Payment terms

element61 will invoice the fees mentioned in this Order Form to the Customer (21% VAT will be applied where relevant).

A normal consultancy day amounts to 8 working hours. A consultancy day will be invoiced by the lowest amount of half a day, unless specifically specified otherwise. Overtime Services are invoiced at a supercharge of 100%. All invoices regarding this order form are payable within 30 days from date of invoice, unless specifically mentioned otherwise. After expiry date of the agreed payment period, element61 has the right, legally and without prior notice of default, to charge additional interest on late payments at the statutory interest rate of 7 % on an annual basis and any costs incurred to be able to collect.

10. Price adjustments

The daily rates mentioned in the "Service Details" section will not be changed, unless with explicit written approval of both the Customer and element61.

There are two exceptions to this clause:

- a yearly indexation, applied automatically at the beginning of each calendar year, unless explicitly agreed otherwise. The formula used is:
 - $\text{rate } <\text{year}> = \text{rate } <\text{year} - 1> * (100\% + (\text{PC200 index } <\text{year}>))$
 - PC200 index stands for the indexation in PC 200 (whereby PC stands for Paritair Comité / Commission Paritaire / Joint Committee) under which element61 resorts.
- consultants might from time to time be promoted according to the element61 Growth Plan. Such promotion typically results in a salary increase and an accompanying rate adjustment. In case the Customer prefers to keep a profile of the current function level with corresponding rate, element61 can offer an alternative resource.

11. Invoicing process

With the process of invoicing, a cost for administration, as well as for payment/collection is associated for both Parties. element61 therefore has the right to bundle Services, delivered over several weeks/months, into one periodical invoice, in case the cumulative amount of the Services provided is less than € 1.500. This typically does not occur during project implementation, but might occur for punctual support Services or small change requests after go-live.

12. Cancellation procedure for Services

Services or part of the Services mentioned in the terms and conditions of this Order Form, may be cancelled by the Customer 10 working days before the actual delivery date of the Service. The Customer agrees that Services cancelled by the Customer within 10 working days of the actual delivery date(s), are assumed to be delivered and as such are part of the invoice. Please note that this cancellation procedure does not apply to any eventual Third Party software, element61 Service Desk or element61 Solution subscriptions contracted.

13. Resource planning

The Customer is aware that planning resources may involve lead times of up to 6 weeks upon commitment of an assignment. In assigning our consultants to projects at our Customers, we apply a first-come-first-served principle, based on fully signed contracts and mutually confirmed planning.

14. Non-solicitation

The Customer agrees to refrain from – neither directly, nor indirectly, such as via a third party – taking any action to solicit, recruit and/or hire element61 employees or contractors that are performing Services in the context of this Agreement.

This is applicable during the term of this Agreement and for a period of one year after the last Services or Solution updates have been provided to the Customer and for all employees or contractors/freelancers which have been made available by element61 to the Customer. Non-compliance with this clause is considered as a serious fault or grave breach of this Agreement by the Customer.

In the event of non-compliance with this clause the Customer will need to compensate element61 by paying a sum of € 45.000 per infraction, which will be invoiced within 30 days from the time the Customer enters into Agreement with element61 staff through an employment contract with the respective person or his company in case of a one-person business or BV/SPRL. This compensation is considered by both parties as a reasonable fee for recruitment, onboarding and training Analytics experts.

15. Court

This Agreement is governed by and shall be construed and interpreted in accordance with the Laws of Belgium. The courts of Ghent, Belgium shall have exclusive jurisdiction of any dispute arising out of or related to this Agreement.
